With over 70 million downloads on Google Play, Dead Target is one of the most The most popular zombie game of all time. Currently, the game is free to download for Android and iOS, which you can download through the links below the article. But first, let's understand some interesting things about this game. Dead Target's scene is set in 2040, a time when humanity's science and technology is taking an important step forward. At the same time, World War III is underway. The Secretary of Defense signed off with a company called MZ, plans to develop the Death Target project: turning soldiers and prisoners into zombies and using them to attack other countries instead of using ordinary troops. But unexpectedly, MZ broke the contract and activated the carcass epidemic globally. The world is on the verge of doom. To begin with, MZ uses the city to test its epidemic, and it is a threat to governments. Unable to allow this to happen, a task force was sent to gather information about the epidemic and prevent it from spreading to other cities. But it's too late. After all, the task force is dead, only you and Agent M survive. Killed or killed? Live or become a corpse? Stay fighting, destroy zombies, save Agent M and wait for reinforcements to come and save you. Gameplay In general, the context of the dead target and gameplay are quite similar to Dead Trigger, but what is special is that you can not move. - yes, that's right. I'm serious. Many players complain about this, maybe we are used to shooting and kite zombies in other games, so standing still in front of dozens of zombies rushing to you is an unpleasant experience at all. However, this has pushed the level of fear and drama of players to a new level. Don't run, you can completely stop invading the zombie with your weapons and supporting SWAT forces.What I like most about this game is that you can't guess what's going to happen next. You don't know where the zombies are going to come from or what they're capable of. Sometimes some zombies look weak, but they can withstand hundreds of circles. Some zombies have the ability to vomit acid or even a fierce zombie dog ready to dive right into you. Whatever the circumstances, you should try to kill as many zombies as possible. It not only helps you survive, but also carries a significant amount of gold. The fastest way to kill a zombie is to aim for your head. It's easier to aim at the chest, but in return you get less money, and sometimes you need more than one bullet to kill them. You need to adjust the increase or decrease in sensitivity so that you can aim in the most accurate way. WeaponsIn the fps game, what most players are interested in arsenal. Through each level, you can discover hundreds of modern dead target weapons. The game has a variety of weapons such as rifles, machine guns, sniper rifles, pistols, grenade launchers... Start with a gun Standard, you can complete most levels with a gun and MP5. Later, more powerful and unpredictable zombies become, this is the right time for you to discover new weapons. Buying new weapons and upgrading them is useful if you are stuck at some stage.
